COURSE DESCRIPTION, REQUIREMENTS, AND LEARNING OUTCOMES

DESCRIPTION:

Emerging Issues in Technology Law and Legal Ethics is a two-credit-hour seminar, designed to provide instruction in the areas of existing and developing technology and legal ethics. This seminar will be taught more broadly than its previous antecedent—which focused primarily on the use of technology in lawyering and accompanying ethical conundrums faced by today’s lawyers. This class will incorporate discussion on the various aspects of existing and developing technology (biotechnology, bitcoin, social media, etc), as well as gaps in the law and public policy. At the conclusion of the course, students are expected to draft a well-researched law review quality paper, twenty pages or more, discussing an issue of interest in the area of modern technology, its societal impacts, and potential legal and policy remedies.

REQUIREMENTS:

CLASS READINGS

Students are required to attend each class, prepared to discuss the assigned readings. The syllabus includes a schedule of assigned readings for each class. Ensure that you read all materials in the textbooks, as well as any other articles you are expected to obtain through electronic databases.

COVID-19 PROTOCOLS, NETIQUETTE & CLASS PARTICIPATION

Class participation—which will include discussion(s) in class, as well as responses and posts on the discussion board—accounts for at least ten percent of your grade! Read your assignments and be prepared to discuss issues related to the topic of the assigned class.

THE MAJORITY OF CLASSES ARE IN PERSON THIS SEMESTER. Accordingly, the University has strongly encouraged students to comport themselves in a manner, conductive to a safe environment. Please review the COVID INFORMATION SHEET included in this syllabus to ensure that you and your fellow students are safe—while on campus.

Some part of the semester course will be taught online, thus students are expected to adhere to a certain netiquette. Please ensure that background noise or distractions are kept to a minimum. I recognize that many may have pets or young children, but it is not helpful to the class (or to you) for those “unexpected observers” to participate in class discussions. Second, please ensure that your video is ON during class discussions. While your mic may remain muted, your video must remain on. As much as jarring noises distract class presentations, so do blank screens. Likewise, choose a background that is not distracting. Your classmates should be impressed with your arguments, not jarring wall decors or virtual backgrounds. Third, despite this seminar format—which should allow for robust discussion—questions should be posed to the professor using the “CHAT” feature. Finally, everyone is entitled to privacy in their educational endeavors. Accordingly, sharing or posting of class recordings, pictures, or screen shots of class are STRICTLY prohibited.
STUDENT LEARNING OUTCOMES:

After completion of the seminar, students will be able to:

(a) Identify an issue or issues, in the area of technology and the law and/or public policy;
(b) Developing and draft a thesis statement, identifying the main point or points of the research paper;
(c) Research, collect, and organize primary (law, caselaw) and secondary sources (books, journal articles) of information;
(d) Analyze and evaluate data/information;
(e) Draft an effective research paper, discussing an issue of significance involving modern technology, advocating for improvement or changes in law and ethics and/or public policy.
